

# NP300 Navara: International Pick-Up of The Year

The International Pick-Up of the Year is a respected and coveted award, which has been claimed by the all new Nissan Navara, in Lyon, France, in November 2016. After enduring a gruelling series of tests, both on and off-road, the worthy victor impressed the judges by a long shot.

The Navara has once again boasted a superior chassis, combined with top of class load capacity, load volume, towing capability and engine power. The class leading five-link independent suspension at the rear, and the 7 speed automatic gearbox, really lifts the new Navara up onto a pedestal. There is a sense of refinement coupled with quality finishes to round off the package. In conclusion, the new Navara keeps its reputation for robust toughness, whilst adding the benefit of being polished, refined and sophisticated.
